

# UAS STRIP MALL SHOTLIST

Safety First!! As the Pilot/Photographer you are responsible for conducting operations legally and safely. Do not fly in a manner that compromises the legality or safety of the operation, regardless of whether or not you are able to fully complete the mission. Skip shots that compromise legality/safety.

**\*\*REMEMBER\*\* – Shots 12-34 should include the SKY STRIP at the top of the picture!! If you have any questions at all on what that means, refer to the Pilot Center page, [www.uasllc.us/pilots](http://www.uasllc.us/pilots), and look at the example picture for Shot #21, or call us.**

**\*\*IMPORTANT\*\*** All Storefronts within the Circled Outline on the Job Diagram you are provided, will need **Angled Storefront Closeup Shots**. These are normally done at about 15 feet height, but can be done from the ground if needed. You can group 2, 3 or 4 smaller stores together per each Angled Storefront Closeup Shot, to keep things quick and easy. You should be provided an example photo, that shows how these Angled Storefront Shots are framed up.

### Pre-Shoot QUALITY Checklist

Note this is an Abbreviated list.. please follow all quality guidelines on the Pilot Center page at [www.uasllc.us/pilots](http://www.uasllc.us/pilots)

22	Aerial Rear – 350 ft Height, <b>**Remember Sky Strip at top of image!!**</b>
25	Aerial Left-Rear – 350 ft Height, <b>**Remember Sky Strip at top of image!!**</b>
26	Aerial Left Side – 350 ft Height, <b>**Remember Sky Strip at top of image!!**</b>

27	Aerial Left Side – 150 ft Height, <b>**Remember Sky Strip at top of image!!**</b>
32	Top-Down “Bird’s Eye” Shot – 350 ft Height, Sites 2 Acres or Smaller Only
33	Wide Overall Shot From Rear of Parking Lot – 30 Ft Height
34	Wide Overall Shot From Rear of Parking Lot – 30 Ft Height

*ALSO VERY IMPORTANT:*

	Angled Storefront Closeup Shots for all Stores within the Circled Area on your Diagram
	If there are Non-Property Outparcels sitting between your circled property outline and the roadway, those non-property outparcels need to be included in the 350-Foot Aerial Shots also, to give a better overall perspective of the Property.
